

~~WELCOME TO GRADE 3!~~

Grade 3 will be filled with many wonderful learning opportunities! In order to be ready for third grade, we ask that you try to read, write, and practice math throughout the summer. You can keep a journal and write about your daily activities or go for a walk and document the flowers, neighbors, and sights you see. In math, practice addition and subtraction facts with flashcards, the websites below, or through real life applications such as math in recipes, telling time, and math at the grocery store. Finally, please read as much as you can over the summer. Below you will find a list of recommended books, but remember to read what you like! What's best to read is what interests you. Please email Ms. Sullo with any questions.

Summer Reading and Math Websites for Students entering Grade 3

Suggested Books ~ Read 2 from this list

1. *Freckle Juice* ~ Judy Blume
